Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Applicant's election of Group I, drawn to at least one perfluoro-organic compound as a solvent for melanin of keratin containing fibers is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Loh (U.S. Patent No. 5,236,563).

Loh report that polyterafluoroethylene is a perfluorinated hydrocarbon. (column 4, lines 63-65).

Applicants' recitation in claim 1 of an intended of the same compound as a solvent for melanin of keratin-containing fibers does not represent a patentable limitation since such fails to impart any physical limitation to the compound.

Art Unit: 1617

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Farmer et al. (U.S. Patent No. 4,776,991).

Farmer et al. teach report that perfluorinated hydrocarbons are currently being used in context of a blood substitute. (column 1, lines 45-50).

Applicants' recitation in claim 1 of an intended of the same compound as a solvent for melanin of keratin-containing fibers does not represent a patentable limitation since such fails to impart any physical limitation to the compound.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker (U.S. Patent No. 4,670,250).

Baker teaches that perfluorinated hydrocarbon can be used to aid in emulsification. (column 4, lines 24-30).

Applicants' recitation in claim 1 of an intended of the same compound as a solvent for melanin of keratin-containing fibers does not represent a patentable limitation since such fails to impart any physical limitation to the compound.

For these reasons the claimed subject matter is deemed to fail to patentably distinguish over the state of the art as represented by the cited references. The claims are therefore properly rejected under 35 U.S.C. 102 (b).

None of the claims are allowed.
